HORIZON SCIENCE ACADEMY DENISON ELEMENTARY SCHOOL

April 24, 2018

To Whom it May Concern,

The purpose of this letter is to serve as a recommendation for Mrs. Beyza Akurek. It has been my pleasure to work with Beyza at Concept Schools for the past 4 years. Beyza serves as math teacher and Title One math teacher. I am the Principal of Horizon Science Academy Denison Elementary School, A Concept School in Cleveland, Ohio. Beyza works very closely with the scholars and teachers in our building. She is a dedicated, passionate educator, who sets high standards and learning goals for her scholars guided by State and Common Core Standards, backed by sound educational research. She is a trusted colleague, cooperative team player, and positive role model. She is professional, highly skilled in communication practices, and cultivates strong relationships with colleagues.

Beyza is a master of using data to inform instruction. She supports her colleagues in this area by training and coaching them in data analysis. In addition, she spends many extra hours committed to her student's success through tutoring, robotics coaching, and extra-curricular activities. She is a big-picture, strategic thinker gifted in problem-solving and passionate about researching strategies to improve student progress. For these reasons, without question, I recommend Mrs. Beyza Akurek. She will be a wonderful asset to her new employer.

Kind Regards,

Mrs. Lea Hammond, M. Ed.
Principal, Horizon Science Academy Denison Elementary
